rapid slide test (agglutination method)

* A single positive result has less significance than rising titres.

* A single titre of 1:80 and above is generally considered positive.

* Tab typhoid vaccination may show simultaneous increase in all antibodies titres.

* Low titers are often found in Normal Individuals.

* Results of the test should be co-related with Clinical Findings to arrive at Final Diagnosis.

* False Positive Results are possible in Acute Viral Infections and some other conditions.
